DETERMINATION OF CUSTOMS VALUES OF CITRIC ACID
UNDER SECTION 25-A OF THE CUSTOMS ACT, 1969.

No. Misc./062017-II

1146

Dated: 20-01-2017

(VALUATION RULING NO. 1015 / 2017)

In exercise of powers conferred under Section 25-A of the Customs Act, 1969, Customs values of Citric Acid are determined as follows:

2. Background of the valuation issue: The values of the Citric Acid for reference/guidance were earlier determined vide Valuation Data Base letter No.157 dated 12-01-2017. There were several representations from different importers/ traders and trade bodies i.e. Pakistan Chemicals and Dyes Merchants Association (PCDMA), for determination of customs value of the Citric Acid afresh. The importers have claimed that the prices of Citric Acid are showing down ward trend in the International market, hence an exercise was initiated to re-determine the values of Citric Acid.

3. Stakeholders' participation in determination of Customs values: Meeting with all the stakeholders including importers, trade bodies i.e. Pakistan Chemicals and Dyes Merchants Association (PCDMA) and representatives from clearance Collectorates, was held on 18.01.2017 to discuss the current international prices of the Citric Acid. The view point of all participants was heard in detail and considered to arrive at Customs value for Citric Acid.

4. Method adopted to determine Customs values: Valuation methods provided in Section 25 of the Customs Act, 1969 were duly applied in their regular sequential order to address the particular valuation issue at hand. The transaction value method as provided in Sub-Section (1) of Section 25, found inapplicable in light of the wide variety of invoices submitted at import stage the veracity of which could not be ascertained fully, hence requisite information required under law was not available to arrive at the correct transaction value. Identical / similar goods value method provided vide Sub-Sections (5) & (6) of Section 25 ibid were examined for applicability to determine Customs value of subject goods, this data provided some references, however, it was found that the same cannot be solely relied upon due to the absence of absolute demonstrable evidence of qualities, and quantities of commercial level etc., and also it was observed that importers usually provided misleading description while declaring goods, as other

types and varieties of similar goods to avoid the application of valuation ruling. Information available was, hence, found inappropriate. In line with the statutory sequential order of Section 25, this office then conducted a market inquiry using Deductive Value Method under Sub-Section (7) of the Section 25 of the Customs Act, 1969, however, it was found that the determination of Customs value could not be based solely upon this method either. Therefore, valuation method provided vide Section 25 (8) of Customs Act 1969, could not be applied as the conversion cost from constituent materials and allied expenses, at country of export were are not available. Finally, PRAL database, market information and international prices through Web were examined thoroughly. All the information so gathered was analyzed for determination of Customs Value of the subject good. Consequently, the Fall Back Method as provided under section 25(9) of the Customs Act, 1969 was applied to arrive assessable customs values of the Citric Acid.

5. **Customs values for Citric Acid;** Citric Acid *hereinafter specified* shall be assessed to duty / taxes at the following Customs Values :-
