Determination of Customs Values of Assorted Medical Items/Equipment-II Under Section 25-A Of The Customs Act, 1969

(VALUATION RULING NO. ¹⁰⁶² / 2017)

No. Misc./12/2017-IX/581

Dated: March 01, 2017

In exercise of the powers conferred under Section 25-A of the Customs Act, 1969, Customs values of different types of Medical Items/Equipment-II are determined as follows: -

2. **Background of the valuation issue:** This Directorate General has earlier circulated VDB values of different medical items/equipment vide Valuation Data Base Letter Nos.180/2017, 181/2017, 182/2017, 188/2017, 189/2017, dated 03-02-2017 and 11-02-2017, respectively. However, some importers approached this Directorate General and requested revision of certain VDBs. Therefore, this Directorate General initiated an exercise for determination of customs value for the subject goods.

3. **Stakeholders' participation in determination of Customs values:** Meeting with stakeholders was held on 28-02-2017. The stakeholders were requested to furnish the following documents before or during the course of above said meeting:-

- Invoices of imports during last three months showing factual value.
- Websites, names and E-mail addresses of known foreign manufacturers of the item in question through which the actual current value can be ascertained.
- Copies of Contracts made / LCs opened during the last three months showing the value of item in question.
- Copies of Sales Tax Invoices issued during last four months showing the difference in price (excluding duty and taxes) to substantiate that the benefit of difference in price is passed on to the local buyers.

4. The representatives of Pakistan Chemist and Druggists Association and many importers attended the meeting. The Association and importers agreed with most of the prices circulated vide VDBs as reflective of traded values. However, agitating on few items some importers claimed that the circulated customs values were on higher side, whereas as per their claim, there was a downward trend in prices in the international market. However they did not submit any corroboratory document/evidence in support of their contentions. All the items' values were discussed one by one in detail.

5. **Method adopted to determine Customs values:** Valuation methods given in Section 25 of the Customs Act, 1969 were followed to arrive at customs value of different types of Medical items/Equipment-II. Transaction value method provided in Section 25 (1) was found inapplicable owing to wide variation in the values being declared to the customs and incomplete descriptions. Identical/ similar goods value methods provided in Section 25(5) & (6) were examined for applicability to the valuation issue in the instant case which provided some reference values of the subject goods but the same could not be exclusively relied on due to wide variation in declared values of subject goods. Thereafter, market enquiry as envisaged under Section 25 (7) of the Customs Act, 1969, was conducted. A number of items sold in the local market were obtained and customs values were worked back from the same. Online prices were also obtained to corroborate the findings of the market surveys. Computed Value Method as provided in Section 25 (8) could not be applied for valuation of the

above-mentioned goods as the cost of raw material and fabrication charges under clause (a) and amount of profit and general expenses under clause (b) of Section 25 (8) of the Act, in the country of export, could not be ascertained. All the information so gathered was evaluated and analyzed for the purpose of determination of customs values of different types of Medical items/Equipment-II, have been determined under Section 25 (9) of the Customs Act, 1969.

6. Customs values of different types of Medical items/Equipment: Customs values of different types of Medical items/Equipment hereinafter specified, shall be assessed to duty/taxes at the following Customs Values :-
