DETERMINATION OF CUSTOMS VALUES OF
GASOLINE (PETROL) GENERATORS CHINESE ORIGIN
UNDER SECTION 25-A OF THE CUSTOMS ACT, 1969

(VALUATION RULING NO.569 / 2013)

No. Misc/12/2007-VII

Dated: 12th July, 2013

In exercise of the powers conferred under section 25-A of the Customs Act, 1969, the customs values of Gasoline (Petrol) Generators of Chinese origin are determined as follows:-

1. **Description of the valuation issue** - The earlier customs values of subject Generators was determined vide Valuation Ruling No.356, dated 19-07-2011. A number of representations were received to determine the values afresh in the light of existing international market prices. This prompted an exercise to re-determine the customs values of the afore stated goods under section 25A of the Customs Act, 1969.
2. **Methodology adopted to determine customs values** - Valuation methods given in section 25 of the Customs Act, 1969 were examined to ascertain which methods were applicable to the valuation issue in hand in terms of section 25A(1) of the Act. Transactional value method provided in section 25(1) was found inapplicable because sufficient information with respect to adjustments to be made to the transactional value in terms of section 25(2) was not available. Identical / similar goods value methods provided in section 25 (5) & (6) were also not found applicable for determination of the customs values due to unreliable values. Computed value method under section 25(8) could not be applied for valuation as the manufacturers costs of producing the goods in question in the country of exportation were not available. Consequently, findings of market enquiry as envisaged under section 25(7) of the Customs Act, 1969 were adopted to determine custom values for Gasoline (Petrol) Generators of China origin in this case.
3. **Evidence used to determine custom values** - Meetings were held with stakeholders on 08-02-2013, 25-02-2013 & 08-04-2013. Accordingly, evidence furnished and results of market enquiry were utilized in terms of section 25(7) of the Customs Act, 1969 to determine the following customs values of the goods in question.
4. **Gasoline (Petrol) Generators of Chinese origin, hereinafter specified, shall be assessed to duty / taxes on the customs values mentioned against them in the table below :-**

Note: If any generator is imported, fitted or equipped with a gas kit, then the customs value thereof shall be enhanced by 15% over and above the customs values as determined above. This applies to all the above categories.

- Validity of this Valuation Ruling** - The customs values determined in this Ruling shall continue to be the applicable customs values for the aforementioned goods till the time this Valuation Ruling is rescinded or revised by the competent authority in terms of section 25A of the Customs Act, 1969. Moreover, this Valuation Ruling applies to cases where declared values are less than the customs values determined in the Ruling. In cases where declared values are more than the customs values determined in the Ruling, the concerned assessing officers shall apply such higher values in terms of section 25(1) of the Customs Act, 1969. Moreover, in case of consignments imported by air, if the differential between air freight and sea freight, when taken into account, raises the customs values above those determined in this ruling, the concerned assessing officers shall apply such higher values in terms of section 25(1) of the Customs Act, 1969.
6. **Remedies against this Valuation Ruling** - The Customs Act, 1969 provides efficacious alternate remedies against this Ruling. Section 25-D provides that any person aggrieved of the Ruling may file a revision petition within 30 days from the date of this Ruling before the Director General, Directorate General of Customs Valuation, 7th Floor, Custom House, Karachi.
