In exercise of the powers conferred under Section 25-A of the Customs Act, 1969, Customs values of Lincomycin Injection, Metronidazole Injection, Gentamycin Injection 80MG 2ML, Oxy tetracycline Capsule are determined as follows:-

4. **Method adopted to determine Customs values**: Valuation methods provided in Section 25 of the Customs Act, 1969 were duly applied in their regular sequential order to address the particular valuation issue at hand. The transaction value method as provided in Sub-Section (1) of Section 25, found inapplicable in light of the wide variety of invoices submitted at import stage the veracity of which could not be ascertained fully; hence requisite information required under law was not available to arrive at the correct transaction value. Identical / similar goods value method provided vide Sub-Sections (5) & (6) of Section 25 ibid were examined for applicability to determine Customs value of subject goods, this data provided some references, however, it was found that the same cannot be solely relied upon due to the absence of absolute demonstrable evidence of qualities, and quantities of commercial level etc., and also it was observed that importers usually provided misleading description while declaring goods, as other types and varieties of similar goods to avoid the application of valuation ruling. Information available was, hence, found inappropriate. In line with the statutory sequential order of Section 25, this office then conducted a market inquiry using Deductive Value Method under Sub-Section (7) of the Section 25 of the
Customs Act, 1969, however, it was found that the determination of Customs value could not be based solely upon this method either. Therefore, valuation method provided vide Section 25 (8) of Customs Act 1969, could not be applied as the conversion cost from constituent materials and allied expenses, at country of export were are not available. Finally, PRAL database, market information and international prices through Web were examined thoroughly. All the information so gathered was analyzed for determination of Customs Value of the subject items. Consequently, the Fall Back Method as provided under section 25(9) of the Customs Act, 1969 was applied to arrive assessable customs values of the Lincomycin Injection, Metronidazole Injection, Gentamycin Injection 80MG 2ML, Oxy tetracycline Capsule.
