Determination of Customs Values of Chemicals, Iso-Propyl Alcohol, N-Propanol, Cyclohexanone, Ethoxylated Nonyl Phenol, Iso-Butanol, N-Butanol and Phenol under Section 25-A of the Customs Act, 1969.

(VALUATION RULING NO. 1158 / 2017)

No. Misc/29/2012-II

11273

Dated: 09 -05-2017

In exercise of powers conferred under Section 25-A of the Customs Act, 1969, Customs values of Chemicals like Iso-Propyl Alcohol, N-Propanol, Cyclohexanone, Ethoxylated Nonyl Phenol, Iso-Butanol, N-Butanol and Phenol are determined as follows:

2. **Background of the valuation issue:** The custom values of the subject chemicals were determined vide Valuation Ruling No 920/2016 dated 29.8.2016. Since Customs values of item no 1 to 7 of the Valuation Ruling No 920/2016 dated 29.8.2016 was linked with applicable average ICIS Scan CRF prices, therefore there were several representations from importers, Clearance Collectorate and Pakistan Chemicals and Dyes Merchants Association (PCDMA), that ICIS Scan is not readily available to all therefore they requested to reconsider the linking of customs value of afore said items with ICIS Scan. They requested that it will appropriate to determine the applicable customs values a fresh. More over the importers have requested to revise the prices of subject chemicals in accordance with the prices in the International market. Since the existing valuation ruling is over eight months old, hence it is required to be revised in the light of honorable High Court of Sind. at Karachi's orders dated 10.11.2015 in Constitutional Petition No. D- 6918/2015. An exercise was therefore undertaken to re-determine the Customs Values of the subject Chemicals in terms of Section 25-A of the Customs Act, 1969.

3. **Stakeholder's participation in determination of Customs values:** Meeting with stakeholders i.e. importers, Pakistan Chemicals and Dyes Merchants Association (PCDMA) and representatives from clearance Collectorates, was held on 12.04.2017 and 08.05.2017, to discuss the current international prices of the subject chemicals. The commercial importers stated that the prices of subject items are required to be de-linked from the ICIS Scan which was duly supported by the (PCDMA). Moreover, the importers requested that the customs

values of the subject chemicals may be determined for imports in drums packing, however adjustments may be made for imports in bulk Iso-Tanks or in Bulk-Vessels. The view point of all participants was heard in detail and considered to arrive at Customs value of the subject chemicals.

4. **Method adopted to determine Customs values:** Valuation methods provided in Section 25 of the Customs Act, 1969 were duly applied in their regular sequential order to address the particular valuation issue at hand. The transaction value method as provided in Sub-Section (1) of Section 25, found inapplicable in light of the wide variety of invoices submitted at import stage the veracity of which could not be ascertained fully, hence requisite information required under law was not available to arrive at the correct transaction value. Identical / similar goods value method provided vide Sub-Sections (5) & (6) of Section 25 *ibid* were examined for applicability to determine Customs value of subject goods, this data provided some references, however, it was found that the same cannot be solely relied upon due to the absence of absolute demonstrable evidence of qualities, and quantities of commercial level etc., and also it was observed that importers usually provided misleading description while declaring goods, as other types and varieties of similar goods to avoid the application of valuation ruling. Information available was, hence, found inappropriate. In line with the statutory sequential order of Section 25, this office then conducted a market inquiry using Deductive Value Method under Sub-Section (7) of the Section 25 of the Customs Act, 1969, however, since the subject goods are not readily available in local market it was found that the determination of Customs value could not be based solely upon this method either. Therefore, valuation method provided vide Section 25 (8) of Customs Act 1969, could not be applied as the conversion cost from constituent materials and allied expenses, at country of export were are not available. Finally, PRAL database, market information and international prices through ICIS Scan were examined thoroughly. All the information so gathered was analyzed for determination of Customs Value of the subject good. Consequently, the Fall Back Method as provided under section 25(9) of the Customs Act, 1969 was applied to arrive assessable customs values of Chemicals.

5. **Customs values for Isopropyl Alcohol, N-Propanol, Cyclohexanone, Ethoxylated Nonyl Phenol, Iso-Butanol, N-Butanol and Phenol;** The chemicals namely Isopropyl Alcohol, N-Propanol, Cyclohexanone, Ethoxylated Nonyl Phenol, Iso-Butanol, N-Butanol and Phenol *hereinafter specified* shall be assessed to duty / taxes at the following Customs Values :-
