Valuation of Calcium Carbide was determined vide Valuation Ruling No. 226, dated 26-02-2010. Since the said ruling was considerably old and needed up-dation as per current international prices, the same was taken up for fresh determination of values.

Accordingly, meetings were fixed for 13-09-2011, 11-10-2011 & 21-12-2011, but none responded for the same on behalf of the importers/other stakeholders. The import data was examined within the meaning of section 25(5) & (6) of the Customs Act, 1969, which depicted import prices of different categories/varieties in the range of US$0.61/kg to US$0.81/kg. In order to verify and check the prevailing price position, market survey was carried out under section 25(7) of the Customs Act, 1969, which revealed that Calcium Carbide containing explosive contents is used in mining industry and is not freely available in the market. However, the value of category used for other purposes, was worked out as US$0.681/kg. Based upon these findings, customs values have been determined under section 25(7) of the Customs Act, 1969, as under:
3. Accordingly, these values are hereby determined under Section 25A of the Customs Act, 1969. All the Customs Clearance Collectorates are advised to finalize assessment of subject goods on the values mentioned above. These values shall remain valid until revised. However, if the invoice value is higher, then such higher value shall be adopted for assessment purpose, in terms of Section 25 of the Customs Act, 1969.
