Determination of Customs Values of Linear Alkyl Benzene Sulphonic Acid (Soft & Hard type) under Section 25-A of the Customs Act, 1969

(VALUATION RULING NO. 999/2016)

No Misc/29/2012-II

Dated 22-12-2016

In exercise of the powers conferred under Section 25-A of the Customs Act, 1969, Customs values of Linear Alkyl Benzene Sulphonic Acid (Soft & Hard type) are determined as follows:

2. **Background of the valuation issue:** Consequent upon representation by commercial importers, regarding revision of Valuation Ruling No.880/2016 dated,28-06-2016 for Linear Alkyl Benzene Sulphonic Acid (Soft & Hard type), an exercise was undertaken to re-determine the Customs Values of Linear Alkyl Benzene Sulphonic Acid (Soft & Hard type) in terms of Section 25-A of the Customs Act, 1969.

3. **Stakeholders' participation in determination of Customs values:** Meeting with all the stakeholders including importers, local manufacturer, Pakistan Chemicals and Dyes Merchants Association and representatives from clearance Collectorates, was held on 16-12-2016 to discuss the current international prices of the subject item. The commercial importers stated that the prices of subject items are showing down ward trend in the international markets whereas the local manufacturers stated that prices of raw materials have gone up in international market in last three months and requested to revise the value of Linear Alkyl Benzene Sulphonic Acid (Soft & Hard type) upward. The view point of all participants was heard in detail and considered to arrive at Customs value of Linear Alkyl Benzene Sulphonic Acid (Soft & Hard type).

4. **Method adopted to determine Customs values:** Valuation methods provided in Section 25 of the Customs Act, 1969 were duly followed and applied sequentially to address the valuation issue at hand. Transaction value method provided in Sub-Section (1) of Section 25 was found inapplicable because it is generally known to all that majority of invoices produced at import stage are manipulated/fabricated and hence the requisite information required under the law was not available to arrive at the correct transaction value. Identical / similar goods value method provided in Sub-Sections (5) & (6) of Section 25 ibid were

examined for applicability to determine Customs value of subject goods, this data provided some references, however, it was found that the same cannot be solely relied upon due to the absence of absolute demonstrable evidence of qualities, and quantities of commercial level etc., and also it was observed that importers usually provided misleading description while declaring goods, as other types and varieties of similar goods to avoid the application of valuation ruling. Information available was, hence, found inappropriate. In line with the statutory sequential order of Section 25, this office then conducted a market inquiry using Deductive Value Method under Sub-Section (7) of the Section 25 of the Customs Act, 1969, however, it was found that the determination of Customs value could not be based solely upon this method either. Therefore, valuation method provided vide Section 25 (8) of Customs Act 1969, could not be applied as the conversion cost from constituent materials and allied expenses, at country of export were are not available. Finally, PRAL database, market information and prices through international Web sites were examined thoroughly. All the information so gathered was analyzed for determination of Customs Value of the subject good. Consequently, the Fall Back Method as provided under section 25(9) of the Customs Act, 1969 was applied to arrive assessable customs values of Linear Alkyl Benzene Sulphonic Acid (Soft & Hard type).

5. Customs values for Linear Alkyl Benzene Sulphonic Acid (Soft & Hard type): Linear Alkyl Benzene Sulphonic Acid (Soft & Hard type), *hereinafter specified* shall be assessed to duty / taxes at the following Customs Values :-
