In exercise of the powers conferred under Section 25-A of the Customs Act, 1969, Customs values of Iron or Non Alloy Steel Wire Rod Low/High Carbon (Draw Quality) determined as follows:

Background of the valuation issue: Since the earlier custom value of Iron or Non-Alloy Steel Wire Rod Low/High Carbon (Draw Quality) determined vide Valuation Ruling No 693/2014 dated 26-09-2014 was considerably old, it needed to revision to reflect the current price trend prevailing in international market of these goods especially the freight. This prompted an exercise to re-determine the Custom value of the afore stated goods under Section 25-A of the Customs Act, 1969.

3. Stakeholders’ participation in determination of Customs values: Meeting with stakeholders was held on 08-01-2018, 05.04.2018 & 12.09.2018, the participants were requested to submitted following documents before or during stakeholders’ meeting:

iv) Copies of Sales Tax Invoices issued during last four months showing the difference in price (excluding duty and taxes) to substantiate that the benefit of difference in price

4. Different stakeholders including importers and officers from clearance Collectorate attended the meetings. The main contention of the importers was that the amount of freight has been kept at very value whereas actual freight have significantly reduced. Moreover, the import in break-bulk has not been considered while determining the values. Certain stakeholders contended that additions on account of draw quality have also been kept at high value. All the contentions of the participants were heard in detail and considered while determining customs value of the subject item.

5. Method adopted to determine Customs values: Valuation methods given in Section 25 of the Customs Act, 1969 were applied sequentially to address the valuation issue at hand. Transaction Value Method under Sub-Section (1) of Section 25 of the Act ibid was found inapplicable because required information under the law was not available. Identical and Similar
Goods valuation methods provided in Sub-Sections (5) and (6) of Section 25 of the Customs Act, 1969 provided some reference values but due to wide variations in the declarations the same could not be relied upon exclusively. In the sequential order this office also conducted market inquiries in terms of Sub-Section (7) of Section 25 of the Customs Act, 1969. Online available information was also checked. All the available information was analyzed and evaluated.
